BROWN DEER NURSERIES

POTTED ROSES

ALL plants are Northern California grown, heavy, No. 1 Grade.

ROSES are potted in papier mache Rose pots and started in cold frames. They are leafed out by May 1st to 15th and ready for delivery to our customers.

THIS year all potted roses will have a large colored tag attached at no extra charge. In addition, all Patented Roses will be in green colored pots and Non-Patented Roses will be in tan colored pots.

SOME suggestions on the care and handling of Roses in papier mache pots: They should be placed on a gravel surface or some other media which allows air to reach the bottom of the pot. In this manner, no rotting of the pot will occur. It is not necessary for the customer to remove the pot when planting, as the pot itself will rapidly breakdown on contact with the soil and allow the roots to penetrate the soil.
